DETAILED ACTION

Claim Objections

1. Claims 2-5 and 7 are objected to because of the following informalities:

In claims 2-5 and 7, line 1, "A" should be changed to --The--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2 and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Garay et al (USP 4,5-4,834).

Garay discloses, in Figs. 1 and 3, a tube (40, 120) formed of electrically conductive material, a dielectric within said tube (45, 135), an electrically conductive wire (30, 110) extending through said dielectric and coaxially with said tube wherein said wire being electrically connected to said tube at one end of said tube, and the wire being electrically connected to the tube by means of electrical wire (130). Furthermore, Garay discloses, in Fig. 3, the feed point (col. 4, lines 37-58) of the antenna being coupled to the tube at an end of said tube opposite to the end at which said wire is electrically connected to said tube, and the antenna being formed from a coaxial cable (110).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Garay in view of DeSantis et al (USP 4,443,803).

Garay discloses substantially every feature of the claimed invention except conductive disc. DeSantis discloses an electrically conductive disc (Figs 4-6) in which a wire is connected to a tube. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ an conductive disc for connecting means as taught by DeSantis. Doing so would improve capacitive loading of the antenna.

Allowable Subject Matter

- 6. Claim 8 is presently allowed.
- 7. The following is a statement of reasons for the indication of allowable subject matter:

The cited art of record fail to teach a folded dipole antenna comprising a first tube and a second tube spaced from each other each formed of electrically conductive material having a dielectric therewithin, said first and second tubes being aligned coaxially, and an electrically conductive wire extending through said first and second coaxially aligned tubes, said electrically conductive wire being coaxial with said

Application/Control Number: 10/659,658

Art Unit: 2821

coaxially aligned tubes, and electrically connected to opposite ends of the coaxially aligned tubes.

Inquiry

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh Vo Dinh whose telephone number is (571) 272-1821. The examiner can normally be reached on Monday to Friday from 9:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong, can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
